SECTION I

INTRODUCTION

1. Scope

This manual contains a list of repair parts and special tools required for the performance of organizational maintenance and a list covering the corresponding requirements for direct support, general support, and depot maintenance for Oscilloscope AN/USM-117B.

2. General

This repair parts and special tools list is divided into four principal parts:

a. *Prescribed Load Allowance List (PLA)*—Section II. The PLA is a consolidated listing of repair parts allocated for initial stockage at organizational maintenance level. This is a mandatory minimum stockage allowance.

b. *Repair Parts for Organizational Maintenance*—Section III. Repair parts authorized for organizational maintenance is included in this section.

c. *Repair Parts for Direct Support, General Support, and Depot Maintenance*—Section IV. This chart lists repair parts authorized for maintenance performance at general support and depot levels. No parts authorized at direct support level.

d. *Federal Stock Number Cross-Reference Index*—Section V. This is a cross-reference index of Federal stock numbers to illustrations by figure and item number.

3. Explanation of Columns

An explanation of the columns in sections II through IV is given below.

a. *Source, Maintenance, and Recoverability Codes, Column 1, Sections III and IV.*

- (1) *Source code, column 1a.* The selection status and source for the listed item is noted here. Source codes and their explanations are as follows:

Code	Explanation
P —	applies to repair parts that are stocked in or supplied from the GSA/DSA, or Army supply system, and authorized for use at indicated maintenance categories.

Code	Explanation
A —	applies to assemblies that are not procured or stocked as such but are made up of two or more units, each of which carry individual stock numbers and descriptions and are procured and stocked and can be assembled by units at indicated maintenance categories.
X2—	applies to repair parts which are not stocked. The indicated maintenance category requiring such repair parts will attempt to obtain them through cannibalization; if not obtainable through cannibalization, such repair parts will be requisitioned with supporting justification through normal supply channels.

- (2) *Maintenance code, column 1b.* The lowest category of maintenance authorized to install the listed item is noted here.

Code	Explanation
O	Organizational Maintenance
H	General Support Maintenance

- (3) *Recoverability code, column 1C.* The information in this column indicates whether unserviceable items should be returned for recovery or salvage. Recoverability codes and their explanations are as follows:

Note. When there is no code indicated in the recoverability column, the part will be considered expendable.

Code	Explanation
R —	applies to repair parts and assemblies which are economically repairable at DSU and GSU activities and normally are furnished by supply on an exchange basis.

b. *Federal Stock Number, Column 1, Section II; Column 2, Sections III and IV.* The Federal stock number for the item is indicated in this column.

c. *Description, Column 2, Section II; Column 3, Sections III and IV.* The sequence number,

Federal item name, a five-digit manufacturer's code, an indenture code, and a part number are included in this column. For subsequent appearances of the same item, the manufacturer's code and part number are omitted. The words "same as" followed by the sequence number assigned to the item when it first appeared in the list will follow the item name, e.g., "RESISTOR, FIXED, COMPOSITION: SAME AS A298." The indenture codes indicate the end item, the assemblies, and the component parts. Identical codes are parts of the preceding higher code.

d. Unit of Issue, Column 4, Sections III and IV. The unit used as a basis of issue (e.g. ea, pr, ft, yd, etc) is noted in this column.

e. Quantity Incorporated in Unit Pack, Column 4, Section II; Column 5, Sections III and IV Not used.

f. Quantity Incorporated in Unit, Column 6, Sections III and IV. The quantity of repair parts in an assembly is given in this column.

g. Maintenance Allowance, Column 3, Section II; Column 7, Sections III and IV.

- (1) The allowance columns are divided into subcolumns. The total quantity of items authorized for the number of equipments supported is indicated in each subcolumn opposite the first appearance of each item. Subsequent appearances of the same item will have no entry in the allowance columns but will have a reference, in the description column, to the first appearance of the item. Items authorized for use as required but not for initial stockage are identified with an asterisk (*) in the allowance column.
- (2) The quantitative allowances for organizational level of maintenance represents one initial prescribed load for a 15-day period for the number of equipments supported. Units and organizations authorized additional prescribed loads will multiply the number of prescribed loads authorized by the quantity of repair parts reflected in the appropriate density column to obtain the total quantity of repair parts authorized.

(3) Subsequent changes to organizational allowances will be limited as follows: No change in the range of items is authorized. If additional items are considered necessary, recommendations should be forwarded to Commanding General, U.S. Army Electronics Command, ATTN: AMSELMR-NMP-RR, Fort Monmouth, N.J., 07703, for exception or revision to the allowance list. Revisions to the range of items authorized will be made by the USA ECOM National Maintenance Point based upon engineering experience, demand data, or TAERS information.

(4) The quantitative allowances for GS levels of maintenance will represent initial stockage for a 30-day period for the number of equipments supported.

h. One-Year Allowances Per 100 Equipments/Contingency Planning Purposes, Column 8, Section IV. Opposite the first appearance of each item, the total quantity required for distribution and contingency planning purposes is indicated. The range of items indicates total quantities of all authorized items required to provide for adequate support of 100 equipments for one year.

i. Illustration, Column 8, Section III, Column 10, Section IV.

- (1) *Figure number, column 8a and 10a.* The number of the illustration in which the item is shown in TM 11-6625-640-15, is indicated in this column.
- (2) *Item or symbol number, column 8b and 10b.* The callout number used to reference the item in the illustration is indicated in this column.

j. Depot Maintenance Allowance Per 100 Equipments, Column 9, Section IV. This column indicates the total quantity of each item authorized depot maintenance for 100 equipments. Subsequent appearances of the same item will have no entry in this column, but will have a reference in the description column to the first appearance of the item.

4. Reference Publications

TM 11-6625-640-15 pertains to Oscilloscope AN/USM-117B and its components.

5. Cross-Reference Index

A cross-reference index of the reference

symbol number and the sequence number is given below. It is to be used for the location of items in the parts list when the Federal stock number for an item is not known. For explanation of the use of this index, refer to paragraph 6.

6. Location of Repair Parts

a. When the Federal stock number is unknown, refer to the Cross-Reference index (para 5) and follow the procedures listed in (1) through (3) below.

- (1) Determine the proper reference symbol.
- (2) Locate the reference symbol listed in the cross-reference index and note the sequence number, in the repair parts list, for the item.
- (3) Use the repair parts list and find the sequence number noted in the index.

b. When the Federal stock number is known, follow the procedures given in (1) and (2) below.

- (1) Use the Index of Federal stock numbers to figure and item numbers and locate the Federal stock number. The Federal stock numbers are listed in numerical sequence and are cross referenced to the figure number and item number.
- (2) Use the repair part listing to find the functional group or subgroup of the repair part and the figure and item numbers as noted in the Index of Federal stock numbers.

7. Federal Supply Codes

This paragraph lists the Federal supply code and the associated manufacturer's name.

<i>Code Number</i>	<i>Manufacturer's Name</i>
01121	Allen-Bradley Co.
01295	Texas Instruments Inc. Semiconductor-Components Division
02660	Amphenol-Borg Electronics Corp.
02735	Radio Corp. of America, Commercial Receiving Tube and Semiconductor Division
04713	Motorola Semiconductor Products Inc.
05402	Controls Co. of America
11711	General Instrument Corp., Rectifier Division
18036	AEF Products Inc.
20183	General Atronics Corp.
70309	Allied Control Co., Inc.
71279	Cambridge Thermionic Corp.
71400	Bussmann Mfg., Division of McGraw-Edison Co.
71590	Centralab Division of Globe-Union Inc.
71785	Cinch Mfg. Co. and Howard B. Jones Division
72699	General Instrument Corp. Capacitor Division
76433	General Instrument Corp., Capacitor Division
80223	United Transformer Co.
80294	Bourns Inc.
81349	Military Specifications
87216	Philco Corp., Lansdale Division
96214	Texas Instruments Inc., Apparatus Division
96906	Military Standards

8. Reporting of Equipment Manual Improvements

The direct reporting by the individual user, of errors, omissions, and recommendations for improving this manual is authorized and encouraged. DA Form 2028 (Recommended Changes to DA Publications), will be used for reporting these improvements. This form will be completed using pencil, pen, or typewriter and forwarded direct to Commanding General, U. S. Army Electronics Command, ATTN: AMSEL-MR-NMP-AD, Fort Monmouth, N.J., 07703.
